Your app's core functionality

We'd like to know more about your apps and the value they'll bring to your users. As you may already know, Google Play's [Spam Policy](#) explains that we don't allow apps that merely provide the same experience as other apps already on Google Play. Apps should provide value to users through the creation of unique content or services.

Please also note that apps must provide an accurate disclosure, description, and images/video of their functionality in all parts of the metadata.

Does your app function differently based on a user's geolocation or language? If yes, why? *

We are planning to use the user's geolocation in the future to locate the nearest available craftsman and assist them with the services they offer. However, for now, this feature is not available. Romanian is the default language.

Have you uploaded all Proof of Permission for any intellectual property that appears in your app? *

- ☒ Yes
- ☐ No
- ☐ No third party intellectual property appears in my app

Please select the statement that applies to you: *

- ☐ I do not have any content locked behind a login wall.
- ☒ I have content locked behind a login wall and have already provided Google with valid credentials to bypass this wall.
We reserve the right to reject your app submission if the login wall could not be passed with reasonable efforts.
- ☐ I have content locked behind a login wall and have not yet provided Google with valid credentials to bypass this wall.
