The system **detects the presence of superstructures** in the passage from the outside to the inside of the company premises.

The ceiling sensor detects areas up to the height of **30 meters**. IS  
It is possible to customize the height detected by the sensor.

The device can be integrated with KiwiSafe to manage the speed limitation of the trolley following the detection of the ceiling.

## Mounting

Install the laser sensor on the rooftop of the truck. It's possible to install this sensor on any kind of machines.

## Kit parts

Relay box

Laser sensor
